

WINE Closure and Capsule Collection

By Amcor Capsules

amcor

Creating a new world of packaging

Born during the engineering and industrial revolution of the 19th century, **AMCOR CAPSULES** has grown to become the worldwide leader in closure technology, expertise and innovation.

Our commitment to performance and eye for aesthetics has led producers round the globe to seal more than two billion bottles of their wine, sparkling wine and spirits with Amcor capsules and aluminium closures each year.

From our offices and production sites throughout the major wine-producing regions of the world, our sales and engineering teams work alongside vintners and distillers to understand the unique challenges they face.

We then merge this firsthand experience with our global research and development capabilities to develop and deliver the largest range of aluminium, tin and poly laminate capsules and aluminium closures in the market.

That's what separates Amcor from everyone else.

"Working side-by-side with our customers each day gives us a more specific insight into their products and challenges. This enables us to share in their passion while deliver the best solutions."

Nicolas Freynet, General Manager

STELVIN® CLOSURES: PRESERVATION, PERFORMANCE, PREFERENCE

Combining an aluminium closure and BVS bottle neck finish with a range of innovative liners, the Amcor STELVIN® closure system has become the preferred choice of winemakers around the globe.

THE SEEDS OF REVOLUTION

In 1964, within the city of Chalon-sur-Saône at the heart of Burgundy, a decade of research and testing gave birth to the first aluminium wine closure: STELVIN®. It offered producers a cure for cork taint. But that was only the beginning.

Early STELVIN® adopters found the closures also produced greater consistency from bottle to bottle, and better preserved their wines' aromas, flavors and freshness. Their enthusiasm attracted more producers to take notice, and new innovations to take root.

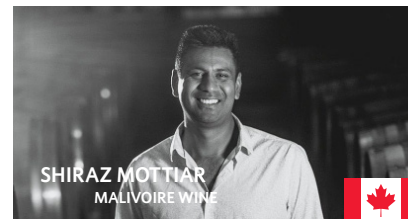

WORLDWIDE INDUSTRY ADOPTION

Today, around 7 billion bottles of wine are sealed with aluminium closures each year.

Thanks to its commitment to innovation, reliability and service, the STELVIN® brand has grown to include STELVIN®LUX, STELVIN®P and STELVIN®Inside, and continues to be the market leader and preferred choice for many winemakers.

Enthusiasts occupy every corner of the globe, with producers in the most revered winemaking regions embracing – and praising – the STELVIN® closure.

They trust us:

"After years of evaluation we entrust STELVIN® closures to ensure the purity and consistent evolution of our most delicate wines."

Kevin Willenborg, Vina Robles, USA

"To me STELVIN® embodies the future: not only for young accessible wines, but also for the great ones. I believe in the excellence of STELVIN® caps."

Franz Haas, Azienda Franz Haas, Italy

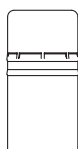

BENEFITS

- A premium appearance and smooth opening - with no external threads
- Larger printable space for more elegant designs and premium finishes
- Guaranteed STELVIN® quality: The only closure able to perform the STELVIN® 'redraw' process
- Patented

LINER OXYGEN CONTROL SCHEME

BENEFITS

- Perfect sealing both before and after the initial opening
- Complete control of oxygen transfer
- A large selection of liners adapted to preserve freshness, flavors and aromas

WHY ELIMINATE PVDC FROM OUR LINERS?

PVDC contains chlorine, making it difficult to recycle. If not properly incinerated, this chlorine emits dioxin – a highly toxic gas.

Eliminating PVDC from our liners will lower the environmental impact of recycling our liners.

DELITE™ - PET Bottle + STELVIN®

A convenient single-source ROPP/PET solution

BENEFITS

- Lightweight, on-the-go portability where glass may be prohibited
- Recyclable, with a smaller carbon footprint than glass bottles
- At 1/6 the weight of glass, lower freight and secondary packaging costs. Also eliminates downtime due to fill line breakage
- Universal glass/PET top-load (minimal investment or changes needed to convert filling line from glass to PET)
- Highly customizable with numerous options for both bottles and closures

AVAILABLE FORMATS

DeLite™ offer is available in the Americas (in Europe on request)

AMCOR CAPSULES

150 years of Excellence

AMCOR WINE CAPSULES: ORIGINS, INNOVATION, EXPRESSION

The Bordeaux region of France has been producing exceptional wines since time immemorial. And in our Saint-Seurin manufacturing facility, we've been producing the industry's finest capsules for more than 150 years.

Since our tin-capsule origins, our team has led the industry by being a part of it – listening to winemakers and developing solutions for their challenges. This has led to advancements in technical performance, creative expression and even budgetary control.

ADVANCING AN INDUSTRY

As part of Amcor, the global leader in flexible packaging, we're empowering winemakers with new materials, such as aluminium and poly laminate, and new techniques such as tactile soft-touch textures.

These ensure you can connect your brand to your consumer, whether you're looking to impress with an intricate embossed design or make a statement through simplicity.

And our anti-counterfeiting solutions can ensure that statement always rings true.

From the smallest independent winery, to the most recognizable global brand, our team has the experience, expertise and engineering to help you craft your customers' experience at every step - from shelf to palate.

Amcor's heritage: General view of the St. Seurin-sur-l'Isle plant, one of the largest capsule producers in France, covering 55,000 square meters. Circa 1853.

Anti-counterfeiting solutions
InTact

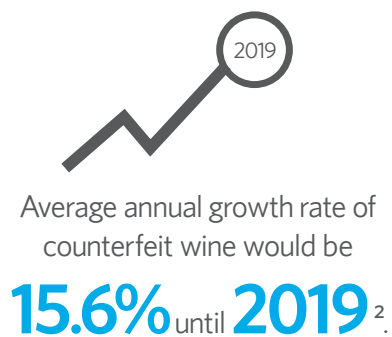

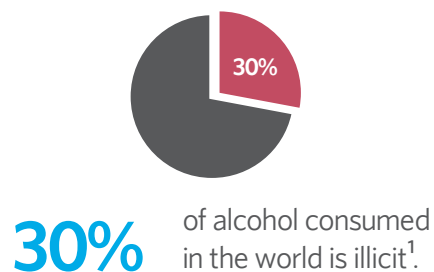

AMCOR'S ANTI - COUNTERFEITING SOLUTIONS

Create the right solution to secure your brand and reputation

While counterfeiting may seem limited to entertainment, fashion brands and technology companies, it affects the wine market as well.

Counterfeiters are finding opportunity in the 26 billion bottles of wine consumed each year, and consumers deserve to know that the wine they are buying is authentic.

Protect your brand, and your business, with Amcor's anti-counterfeiting solutions.

¹ International Center for Alcohol Policies

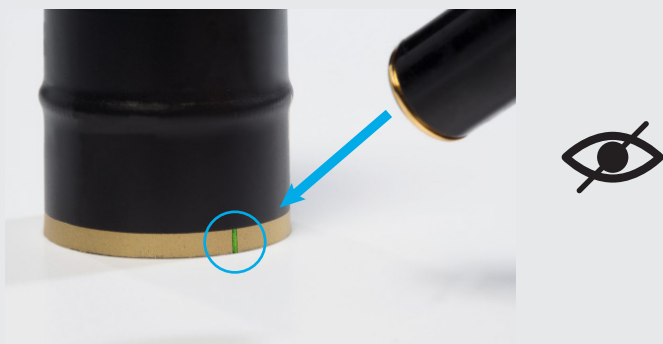

² International Chamber of Commerce / Organization for Economic Co-operation and Development.

³ Robert Taylor, Wine Spectator, 21st November 2013.

SOLUTIONS FOR PROTECTING YOUR BRAND

SPYCAP

This industry-leading technology enables winemakers to privately confirm a bottle's authenticity using a light pen to reveal the luminescent ink only visible under specific wavelengths.

ANTI-REMOVAL SYSTEM

The innovative heat-sealing solution (S+ gluing) guarantees the tin or aluminium capsule cannot be removed without visible damage. A water-activated solution (Autofix) is available for poly laminate capsules.

SOLUTIONS FOR AUTHENTICATION

HOLOGRAM

A security hologram hot-stamped on the capsule can be used to authenticate bottles sealed with capsules or closures.

SMART CAPS

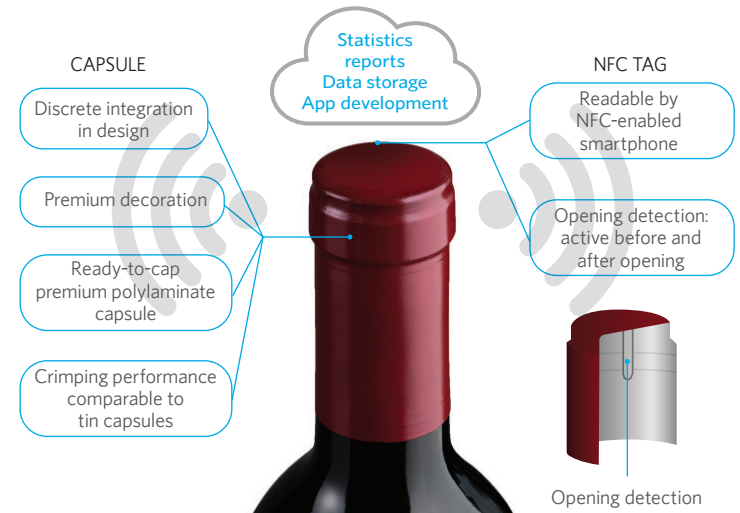

Our tailor-made solutions give every bottle of your wine a unique digital identity

BENEFITS

- **Protect your brand, fight counterfeiting** and instantly verify product authenticity
- **Track and trace** all the way to consumption and avoid grey market diversion
- Create deeper **consumer engagement** by digitally linking retail and product experiences
- **Data collection:** gain valuable insights into purchasing behaviour thanks to instant consumer data collection and statistics reports
- **An integrated solution** - including capsules/closures, web service platform, bottling line equipment and consulting - all from one provider

Tag security adapted to your budget and needs: define the right level of security according to your product value, wine life cycle and loss impact.

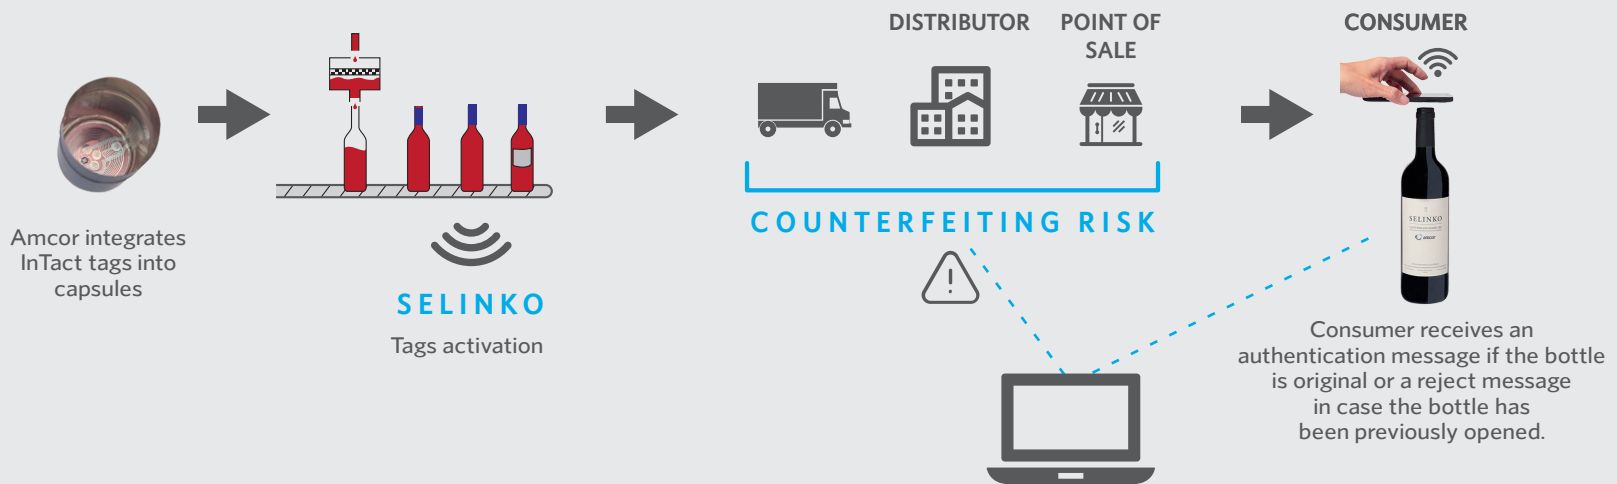

SECURE & FLEXIBLE

The secure platform lets you activate Brand Protection, Traceability and Consumer Engagement services in combination or separately.

AMCOR'S DESIGN AND INK EXPERTISE

We create capsules and closures that match the standards of your precious products.

SOFT TOUCH EFFECT

A TOUCH OF VELVET

Add an extreme matte look and sophisticated soft texture.

METALLIC INKS

METAL EFFECT

Enhance your design with reflective inks to make your closure shine.

OPTICAL BRIGHTENERS

GLOW IN THE DARK

Stand out in the club with fluorescent inks that shine under black light.

MIRROR INKS

ADD SHINE

Add a mirror shine to stand out from the crowd.

PEARLESCENT INKS

ADD SHIMMER

Apply pearlescent inks to add an elegant and refined finish for upscale products.

4-COLOR (CMYK) PRINTING

CREATIVE DESIGNS

Use full 4-color process to make special or limited editions even more unique.

THERMOCHROMIC INKS

REVEAL THE PERFECT SERVING TEMPERATURE

Delight connoisseurs with inks that change color at specified temperatures.

TACTILE INKS

A TOUCH OF MYSTERY

Engage the senses with this special varnish that creates textured effects on the skirt.

HOT FOIL/ STAMPING

EYE CATCHING DECORATIONS

Catch the light and the eye with hot stamped foil designs.

PRINTED EMBOSSED ON HEAD

RAISE YOUR GAME

Elevate your brand using embossing decorated with ink or foil.

LASER ENGRAVING

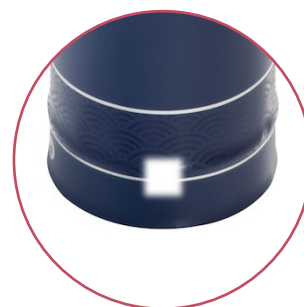

INTRICATE DESIGNS*

Allude to complexity with precision engraved details.

* only available in North America

INVISIBLE UV SPOT

A PERFECT ALIGNMENT

Create seamless artwork with this invisible spot that perfectly aligns the label and closure/capsule designs.

SUSTAINABILITY

We design packaging that's good for business and better for the environment

We are proud that global and regional indices recognize us for our sustainability performance.

Amcor's 2025 Pledge

Amcor will be the first global packaging company to ensure all its packaging is recyclable or reusable by 2025.

QUALITY

INTERNAL QUALITY CONTROL PROCESSES

- Controls are done at every step of the capsule/closure production process.
- Controls include color verification, height verification, liner groove verification, bridge opening verification, torque test...
- Controls results are recorded for a better analysis when needed.

SUPPLIER AUDITS

- Our suppliers are annually evaluated during quality audits.
