

SPARKLING WINE Hood and Closure Collection

By Amcor Capsules

amcor

Creating a new world of packaging

Born during the engineering and industrial revolution of the 19th century, **AMCOR CAPSULES** has grown to become the worldwide leader in closure technology, expertise and innovation.

Our commitment to performance and eye for aesthetics has led producers round the globe to seal more than two billion bottles of their wine, sparkling wine and spirits with Amcor capsules and aluminium closures each year.

From our offices and production sites throughout the major wine-producing regions of the world, our sales and engineering teams work alongside vintners and distillers to understand the unique challenges they face.

We then merge this firsthand experience with our global research and development capabilities to develop and deliver the largest range of aluminium, tin and poly laminate capsules and aluminium closures in the market.

That's what separates Amcor from everyone else.

"Working side-by-side with our customers each day gives us a more specific insight into their products and challenges. This enables us to share in their passion while deliver the best solutions."

Nicolas Freynet, General Manager

AMCOR CAPSULES

The worldwide leader in tin and premium polylaminate hoods for Champagne and sparkling wines

THE AMCOR HOOD COLLECTION FOR SPARKLING WINES

More than with any other beverage on the planet, the act of opening a bottle of Champagne is an integral part of the experience. That experience begins when the customer grasps the hood.

This is why we're so passionate about producing the world's finest hoods for Champagnes and sparkling wines.

ROOTED IN AN ARTISAN TRADITION

In the birthplace of Champagne, our Mareuil-sur-Ay manufacturing facility produces hoods for some of the most world-renowned Champagne brands. They turn to us for the industry's only premium tin hood, along with a selection of other exceptional materials and customization options that help them enhance their exclusive market position.

Our expertise, however, extends well beyond this region of France. We help both established and emerging sparkling wine brands around the globe develop branded experiences for their consumers – at all price points and production sizes.

ARTISANAL TIN CRAFT: IN-HOUSE EXPERTISE

A DEEP COLOR CUSTOMIZATION TO ENHANCE THE CUSTOMER DESIGN

We recover and recycle all tin waste from the production lines in our manufacturing facilities.

EXPERTISE IN HOOD FORMING, COLORING AND CUSTOMIZATION

POLYLAMINATE HOODS – EXPERTISE IN OVERSIZED HOODS

FROM JEROBOAM TO NEBUCHADNEZZAR

Aluminium closures

STELVIN®P

STELVIN® with Pressure liner - STELVIN®P

The aluminium closure for lightly sparkling wine

The STELVIN®P aluminium closure features a special liner designed exclusively for lightly sparkling wines. After more than a decade in the market, it's still the choice for winemakers around the world.

THE SEEDS OF REVOLUTION

In 1964, within the city of Chalon-sur-Saône at the heart of Burgundy, a decade of research and testing gave birth to the first aluminium wine closure: STELVIN®. It offered producers a cure for cork taint. But that was only the beginning.

Early STELVIN® adopters found the closures also produced greater consistency from bottle to bottle, and better preserved their wines' aromas, flavors and freshness. Their enthusiasm attracted more producers to take notice, and new innovations to take root.

INNOVATION LEADS TO ADOPTION

Today's STELVIN®P features state-of-the-art liner technology that enables producers to perfectly preserve lightly sparkling wines.

With Amcor's Research Centres of Excellence continuing to work alongside Champagne and sparkling wine producers around the globe, new innovations are always in development to meet the needs of both small independent producers and worldwide brands.

STELVIN® with Pressure liner - Choose the leader for your lightly sparkling wines

Famous STELVIN® quality with a dedicated liner for sparkling wines

BENEFITS

- Excellent seal properties
- Maintains perfect carbonation levels up to 6 bars internal pressure
- Easy to open, close, reopen, store and transport
- Dedicated technical service team can assist in all steps of a new project development

STELVIN® P LINER

THE EXPERT LINER FOR STELVIN® CLOSURE DEDICATED TO LIGHTLY SPARKLING WINES (> 1,2G CO₂/L).

Up to 6 bars internal pressure

AVAILABLE FORMATS

	ø (mm)	Height (mm)

AMCOR'S DESIGN AND INK EXPERTISE

We create hoods and closures that match the standards of your precious products.

SOFT TOUCH EFFECT*

THE VELVET TOUCH

Add an extreme matte look and sophisticated soft feeling.

PEARLESCENT INKS*

ADD SHIMMER

Apply pearlescent inks to add an elegant and refined finish for upscale products.

VARNISH*

ADD GLOSS

Make your design and colors shine with this eye-catching effect.

TONE ON TONE*

REFINED AND ELEGANT DETAILS

Superposition varnish on the background color for an elegant and refined look.

4-COLOR (CMYK) PRINTING

CREATIVE DESIGNS

Use full 4-color process to make special or limited editions even more unique.

TACTILE INKS*

DESIGN IN RELIEF

Engage the senses with special textures achieved through hot-stamping (on hoods) or with a special varnish (on closures).

MICRO-TEXTURE

INTRICATE DESIGN

Allude to complexity with precision micro-texture effects.

HOT FOIL/ STAMPING*

EYE CATCHING DECORATIONS

Catch the light and the eye with hot-stamped foil designs.

UV SPOT*

A PERFECT ALIGNMENT

Create seamless artwork with the UV spot that perfectly aligns the label and hood designs.

INSIDE PRINTING

SURPRISE AND DELIGHT

Engage your customers with colors and messages printed inside your hood.

SPECIAL TEXTURING

ADD TEXTURE

Choose from a variety of texture options for poly laminate hoods.

DESIGNED BOTTOM SHAPE

BE AN ORIGINAL

Differentiate your brand with a unique shape to the bottom of your hood.

* Also available on aluminium closures

SUSTAINABILITY

We design packaging that's good for business and better for the environment

We are proud that global and regional indices recognize us for our sustainability performance.

Amcor's 2025 Pledge

Amcor will be the first global packaging company to ensure all its packaging is recyclable or reusable by 2025.

QUALITY

INTERNAL QUALITY CONTROL PROCESSES

- Controls are done at every step of the hood/closure production process.
- Controls include color verification, opening, alignment and dimensions verification.
- Controls results are recorded for a better analysis when needed.

SUPPLIER AUDITS

- Our suppliers are annually evaluated during quality audits.
