—— our glass is ——
100% **recyclable**
& **ocean** SAFE

Sustainable. Reliable. California.

Gallo Glass is one of the top three wine container manufacturers in North America. Located in Northern California, the newly renovated plant has the most advanced glass technology and makes over 2.5 million bottles daily for the wine and spirits industry.

Committed to clean and sustainable manufacturing, our bottles are made with up to 70% recycled glass and the majority of our raw materials are sourced from California. With four energy efficient oxy-fired furnaces to drastically reduce our environmental impact, we are engineered to support California's climate change initiative.

Our team is passionate about glass and the positive attributes associated with glass. Made from all-natural materials, glass is ocean friendly and 100% infinitely recyclable, creating an authentic premium package. Built on over 60 years of glass making tradition, we've applied modern technology to produce the highest quality glass bottles. **Gallo Glass is your direct local source of sustainable and reliable wine bottles made in California.**
